DETAILED ACTION

1. This communication, Action, is a continuous effort for resolving the issue of claim group election. During early period of August, 2006, four telephone conversations were conducted between Mr. Gideon Gimlan and Examiner for discussing the issue. Mr. Gimlan kindly informed Examiner about Applicant's decision on "not to elect" and advised Examiner to send out election/restriction Action. Examiner further left a voice message to Applicant (Mr. Gideon Gimlan, Registration 31,955) on August 17, 2006 concerning election/restriction Action is being conveyed.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, drawn to storage and presentation system, classified in class 715, subclasses 505, 509, 517, 526 and 530.
 - II. Claims 39-75, drawn to expression storing and transmitting system, classified in class 709, subclasses 100, 200 and 300.
 - III. Claims 76-88, drawn to manufactured signal for defining data objects, classified in class 707, subclasses 101-102.
3. The inventions I, II and III are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I is related to presenting expressions to users on the Graphic User Interface, including forms, tables and layouts. Invention I also further involves display processing and edit, composition or storage control.

Invention II is mainly related data transmitting, including task management control, multi-computer data transferring and inter program or process communications.

As for invention III, it is database and file management or data structures art. The invention further includes defining and manipulating data structures and generating reports.

Because these inventions are distinct and related to different art sub-classifications, restriction for examination purposes as indicated is proper. Also please be advised this election/restriction does not preclude any further election/restriction of claim groups in each specific art above.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Applicant is reminded that the reply to this restriction election to be completed must be include an election of the invention to be examined within one month from the mailing data of this office action, even though the requirement be traversed (37 CFR 1.143).

Contact Information
